PROPOSALS:

[REDACTED]

25X1A

19 November 1956

Dear George:

Enclosed are two proposals covering the study and design phase and the production phase of the System 1 recorder modification. As you will recall, this is the work undertaken to provide sharp cut-off in the event of power failure and the correction of poor performance at very low temperature operation. The study led to the inclusion of a magnetic solenoid actuator for the jam-roller and to the development of an electrically heated cover.

25X1A

The estimated cost of the study and design phase is [REDACTED] and the fee, computed at [REDACTED]. The total cost, including fee, is [REDACTED].

25X1A

25X1A

25X1A

The estimated cost for the production of the heater covers and retrofit of the recorder units is [REDACTED] and the fee, computed at [REDACTED] is [REDACTED]. The total cost, including fee, is [REDACTED].
